

Think spatial,  
discover potentials,  
develop solutions!

## Webdesigner/UI-Designer [m/w]

---

If you are interested in innovative projects, dynamic and flexible teamwork as well as developing solutions for challenging problems, we will be happy to welcome you in our team!

We are a young start-up company which is active in the field of specialised geographic information systems, web application development as well as collection and analysis of geographical data. We consider geographical data as a possibility to understand and explain relationships and generate innovative solutions. You will find further information about the company on our website [www.egeos.de](http://www.egeos.de).

### What are your tasks:

- Development of ideas, concepts and design proposals for our web applications
- Compilation and implementation of graphic user-interface designs/concepts
- Establishment of design specifications for our software developers and rapid prototyping

### What do we expect from you:

- Creativity and a sense for design and usability of applications
- Confidence in using the main designertools (e.g. Adobe Illustrator/Photoshop)
- Solid knowledge of HTML5, SASS/CSS3 and JavaScript
- Experience with JavaScript based frontend frameworks (e.g. React, AngularJS, Vue.js)

### What do we offer you:

- Challenging and interesting projects with the newest technologies
- Working with a highly-motivated international team
- Possibilities to actively shape a young companies future

You can send your application to [info@egeos.de](mailto:info@egeos.de) until the **28<sup>th</sup> of February 2017**. If you have any questions, please do not hesitate to contact us via mail or phone.
